

SNMP

Bcn (SP) Oct/1st /2014

PR - 25 words

From now on all the hand-held instruments listed in 2014' portfolio support Simple Network Management Protocol (SNMP) and Managed Information Base (MIB)

PR - 50 words

All hand-held instruments (including AT-2048, Net.Shark, Net.Hunter, Net.Storm, Ether.Giga, Ether.Sync, Ether.Genius) support SNMP and MIB technology. Units can be upgraded downloading this new functionality at each page product of the corporate web site www.albedotelecom.com

PR - 100 words

ALBEDO hand-held instruments (including testers, taps and WAN emulators) do support SNMP and MIB technology. The upgrade can be downloaded from ALBEDO's web site. All these devices can now store configuration, management and result information through a MIB that can be queried via SNMP agents or a Console. Management tools can now pool the agents to retrieve the MIB information stored in the above mentioned list of instruments.
